

My name is Brittany Panda and I have been with the Alliance Center for Education since February 2023. Over the years, I have had the pleasure of supporting young children, adolescents and adults in different capacities. Mental health has always been a passion of mine because it begins to contribute to an individual's overall functionality. Providing ongoing mental health support and bringing forth awareness has helped me to create an avenue that promotes mental wellness.

I am honored to be a part of the AC4Ed family, bringing my expertise to support and raise awareness for ongoing mental health and wellness while working to reduce misconceptions of such an important part of our work and lives. Alliance Center for Education has allowed me to put those practices into place to support our staff, as well as the children and families that we serve.
